

The 1st Pan African Mosquito Control Association Annual Conference 2014

6-8 October 2014, Panari Hotel, Nairobi

Conference Theme

Challenges of vector control in the malaria eradication era

1st PAMCA Annual Conference 2014

Call for Abstracts

PAMCA, Africa's first network of vector control professionals, is excited to announce its first conference which will be held between 6-8th October in Nairobi, Kenya. This event will draw a range of individuals and organizations including mosquito researchers, vector control specialists, industry representatives, NGO's, students, policy makers and educators from across Africa and beyond to share ideas, collaborate and explore innovative approaches to combat vector borne diseases. Attendees will have access to the latest mosquito research innovations and expert opinion in this dynamic field.

We would like to invite all professionals, industry practitioners and students engaged or interested in mosquito vector control to attend and participate in this unique gathering.

Conference Sub-Themes

Papers are solicited for under specific sub-theme including but not limited to the following:

1. Host-pathogen interactions and immunity
2. Population genetics, bioinformatics and biotechnology
3. Vector ecology and behaviour
4. Insecticide resistance and management
5. Vector biology and control
6. Social sciences and vector control

Please visit the conference website <http://events.pamca.org/> for more information
